He has travelled the world to learn from the best, adapting skills from world class clinicians to provide the best possible outcome in the field of dental implants.

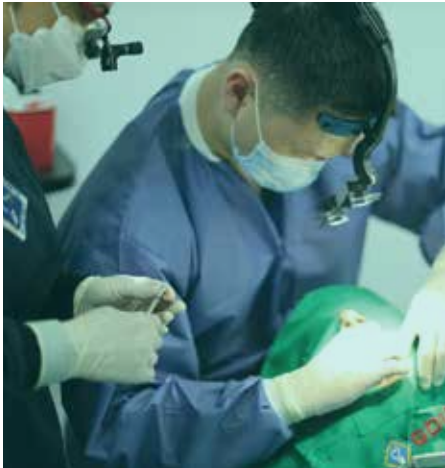

- Member of Australian Dental Association
- GDIA Diplomate (U.S.A)
- BDS University of Sydney 1998
- Past Australian Defense Force Dental Officer
- Fellow of ICOI
- BII master program graduate

COURSE OBJECTIVE

This course is a 3-day program designed to cover basic didactics of multiple aspects of dental implant surgery and digital guided surgery. This course will allow clinicians to build fundamental knowledge of implant placement, diagnosis and treatment, basic surgical principles (such as suturing, incisions, and flap design), and operation on single and multiple implants on partially edentulous patients. After this course, you will be expected to understand the planning and surgical protocol for the use of surgical templates. You will know how to perform proper placement of dental implants through free-handed and computer guided surgery. You will be able to perform live surgeries on your own patients as the instructor (course directors) will be supervising the entire surgery.

COURSE CURRICULUM

<p>Day 1</p> <p>11th Nov 9am-17:00pm</p>	<p>1.
